Features & Benefits

New ICE Range of Display counters is developed for Higher Energy Efficiency than ever and much more possibility for products benefiting from enlarged display areas and improved lighting with excellent all round product visibility and fantastic profile design.

Patent Multijet Air Curtain Technology showing excellent energy-saving effect

Multijet air curtain could increase the curtain thickness. Additional ambient air curtain will isolate the cooled air, achieving big savings on energy consumption. In addition, inner high-speed air could effectively keep the temperature inside the case, while outer low-speed air could restrict turbulence.

High Efficient Fan Motor greatly reducing energy consumption (optional)

High efficient fan motor with outstanding performance could further reduce the cost, cutting down far more energy consumption than general fan motor.

Hussmann EcoShine LEDs

- Brighter than ever (up to 3 time brighter than fluorescents)
- Up to 67% energy reduction for much lower energy costs
- Optimized by department for meat, dairy, etc. with best temperature and color rendering index
- Excellent durability 5~10 year lump life

Cyclopentane Foam with world leading environmental protection technology

All the insulating foam used in our manufacturing plants utilizes Cyclopentane as the blowing agent, an innocuous substance for the environment(ODP=0).
